Eco-friendly building solutions

*Member since July 2009*

### **MANAGEMENT AND LEADERSHIP**

#### **Environmentally Preferable Products and Services**

*We offer no VOC paint, FSC wood products, and green building alternatives for all areas of construction.*

#### **Environmental Restoration or Community Environmental Projects**

*We are members of the Surfrider Foundation, Sierra Club, Grow Berlin Green Committee, and donate to Habitat for Humanity.*

### **WASTE**

#### **Solid Waste/Material Use Reduction and Reuse**

*We use post consumer building materials, and recycle/reduce/reuse whenever possible. We estimate diverting 2 tons of recyclable building material from the landfill since September 2008.*

#### **Recycling**

*We do on-site recycling instead of using a general construction dumpster.*

#### **Hazardous Waste/Toxic Use Reduction**

*We do staged cleaning of paint brushes in mineral spirits, which maximizes the use of the mineral spirits and reduces the amount that must be disposed.*

### **TRANSPORTATION**

#### **Employee Commute**

*We always carpool.*
